

This list presents some cardiology-related continuing education sessions produced in French for the RAFT network, using Dudal.

The Dudal software is a Java-based application launched from a web browser using the Java Web Start technology. It uses a very low bandwidth (30 kbits/second) so that analogic modem-equipped places can follow the sessions. This explains the rather low quality of sound and images.

Video Title	URL	Lecturer	Country
Accidents thromboemboliques en chirurgie orthopédique et traumatologique	http://raft.unige.ch/dudal-html5/dudal.html?coursePath=000391	Prof. Gaetan Duval SOLOFOMALALA	Madagascar
